- Pivot -Tracker

PROFILE

I am a full-stack Javascript engineer. I am passionate about providing the best user experience possible by creating user interfaces that are intuitive and adhere to the standard design principles

CHARACTER REFERENCES

Available upon request

SOME OF THE PROJECTS I HAVE WORKED ON SO FAR

MOBICASH

- I rebuilt the National ID API that we use when we want to retrieve citizen information in our services like Iterambere Fund and Mobidoc.

- I am working on Mobidoc which is an electronic health record and medical practice management application. This application will be used in Health Post at the Cell level.

- I am in charge of Deploying, managing, and maintaining all Javascript related applications(NodeJs/Express, React, Vue Js, Nuxt JS, Angular).

ANDELA RWANDA LTD

- I was a backend Engineer on Converge. Converge application was designed to manage the availability of office rooms and their properties at Andela Offices anywhere in the world. Each office was registered as well it's properties(like chairs, screen, projector). If you wanted to use any office room you would check if it is free at the tablet on the office door or the google calendar. When it is free you can book at the tablet or google calendar too.

- I also worked as a frontend and backend Engineer on Author's Heaven. The Author's Heaven was a web application designed to provide a platform where people can express themselves via writing and reading.

TRANSAX RWANDA

- I was a Frontend Engineer of the Dashboard of https://kazaneza.rw. This is a project which helps people in this period of COVID-19 to register their visitors(Churches, restaurants, and Hotels).
